1 | FOREWORD

A REBOUND IS ON THE HORIZON FOR CANADIAN COMPANIES

This year the business world took a brief competitive pause to join forces on a collective issue – flattening the curve and getting COVID under control. Canadian organizations and staff alike, have banded together and pivoted their business models, to stay afloat. As we look ahead to 2021, one thing is clear, recovery will be tough. It is not the first time Canada has faced difficult business conditions and I can assure you that it will not be the last time. It's not how we fall, it's how quickly we get up and Canada is almost back on its feet.

COVID wasn't the only challenge. There were signs of trouble well before the pandemic began. By January we were involved in a tariff war with the United States, faced downward pressure on commodity prices, and were deeply entangled in a political situation with China. The spring was gloomy and at our lowest we had 3.1 million unemployed, the highest rate since 1976 (13.7%). The summer brought new hope and Canadians powered through. Our financial system weathered the storm, and autumn's falling leaves buried the path from where we had been. The Canadian economy was well positioned to transform challenges into opportunities.

Both economists and employers are optimistic about Canada's recovery

Our guide echoes this sentiment with 71 percent of employers say they feel optimistic about Canada's employment outlook. As companies emerge from pandemic-related shutdowns, they're focusing on capitalizing on the opportunities of today and tomorrow. For example, 61 percent of companies told us they've created leaner internal approval processes and have become more agile in their ability to respond to changing market conditions

Employers can turn challenges into transformative change – but only with engaged, motivated employees

Of course, if companies want to act on these necessary, change-driven strategies, they need the right talent in place. Throughout 2020, the focus has been business stabilization. For the latter half of the year and into 2021, the new focus is the rebound – business growth and capturing market share. Recruiting great candidates will always be important, but retaining existing employees is more important than ever. Your competitors are rebuilding, and our guide found that 49% percent of employees are seriously considering leaving their current role.

Forty-three percent of employees said their employers took no measures to support their well-being during the pandemic. Sixty-one percent of employees said they expect a work-from-home option to be offered once the pandemic is over, although most employers have not yet disclosed their long-term plans. Progressive organizations will prioritize their staff's well-being and invest in their engagement regardless of where they perform their tasks. These are the organizations who will win the war for talent.

Employers must look internally – not just externally – to address the persistent skills shortage

Employers must innovate not just in terms of their products and services, but in terms of their internal training programs as well. This year, nearly half of employers reported a lack of skilled talent on the market while 44 percent of employees indicated that professional development is a major deciding factor when choosing a new job. Why the disconnect? This has been a recurring theme in our salary guides from year to year. Human resources and learning & development teams should consider designing robust internal training programs to develop the skills they need – both for incoming professionals and existing employees. In the meantime, Hays Canada is focused on providing the talent employers need to keep their businesses strong, sustainable, and competitive.

The past year has underscored the importance of not just worker health and safety, but social justice as well. This year's report includes a message from the Chief Client Officer of the Canadian Center for Diversity & Inclusion on conflict resolution in the workplace. At Hays we're working internally on our own equity, diversity, & inclusion (EDI) goals and externally to help our clients create diverse and inclusive workforces by driving non-bias hiring practices.

On behalf of everyone at Hays, I want to wish all organizations a healthy and productive end to 2020, and a strong start to the coming year.

Travis O'Rourke

President, Hays Canada

METHODOLOGY

This survey was conducted from July 29th to August 25th 2020 with a representative sample of n= 1946. The survey was conducted online in English and French and has a two percent margin of error with 95% confidence level.

¹ "Canadian economy resilient even as global outlook worsens." Bank of Canada. 2019.

² Gross domestic product, income and expenditure, second quarter 2020. Statistics Canada. August 28, 2020.

³ Parkinson, David. Canada's economy sees record quarterly slump; June gains suggest early COVID-19 efforts 'paying off'. The Globe and Mail. August 28, 2020.

2 | FINDINGS

Business leaders are optimistic about Canada's economic recovery

Despite the pandemic and economic downturn, 71 percent of Canadian employers are optimistic about the country's employment outlook. As a result, the majority of employers plan to keep permanent headcount steady over the next 12 months.

Employers are tightening their salary budgets; employees remain restless

Only 19 percent of current employers plan to increase current employees' salaries between 3% - 5%. Meanwhile, 21 percent of employees plan to switch roles in the next 3 months and 17% wish to do so over the next year.

3 |

Underwhelming employer response to staff wellbeing

A surprising 43 percent of employees said their employers took no measures to support their well-being during the pandemic, citing an increase in workload, isolation, and loneliness as their top challenges.

Businesses are embracing agile work to thrive in a challenging economic environment

Businesses across industries are re-thinking old methods of work to stay adaptable in a challenging business environment. To this end, 61 percent of businesses say they've created better internal approval processes to become more agile and adaptable.

RECOMMENDATIONS

Companies must get creative to survive the new world of business

Sixty-eight percent of companies reported that the pandemic had a negative impact on their sales. Over the past several months, the pandemic has accelerated trends like digital payments, online shopping, and omnichannel customer experiences. Companies must catch up or get creative to stay competitive and profitable.

Employers should take responsibility for professional training and development

Forty-eight percent of employers cited a lack of skilled talent as their biggest hiring challenge. Developing robust internal training programs would be a worthwhile investment. Forty-four percent of employees say that professional development is the most important factor when considering a new job, not including salary.

Business leaders must pay attention to employee well-being to survive the economic recovery

Over half of employers say they've taken no measures to improve worker mental health. Neglecting employee well-being in the short term can have a detrimental impact over the long term as unsupported employees look for better opportunities.

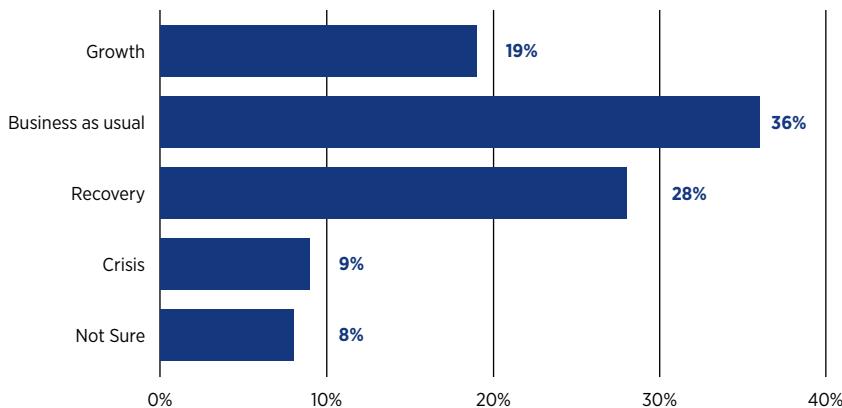

Employers will need to incorporate work-from-home options into their business-as-usual plan

Sixty-one percent of employees say they expect flexible, work-from-home options to continue when pandemic-related measures end. Employees now know that their work can be completed at home, and their workplace expectations will change accordingly.

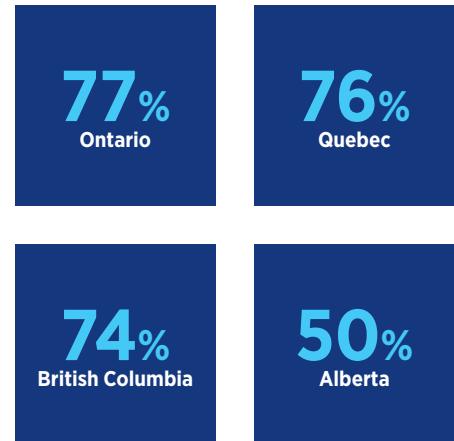

3 | CURRENT STATE OF THE MARKET

This year, seventy-one percent of employers said they are feeling optimistic about the Canadian future employment outlook. While 36% of employers describe their current organizational phase as business as usual, 28% are currently in recovery mode.

Which of these best describes the current phase of your organization?

ECONOMIC OUTLOOK

JOHN FARAGUNA
President, Hays Americas

It was very sobering for me to review last year's salary guide. While in that issue of the guide we discussed the increasing need for companies to support remote working, and emphasized the necessity and benefits of embracing Equity, Diversity and Inclusion in the workforce, we could not have foreseen the approaching storm.

That pre-Covid time seems like years ago to me. It is truly shocking how things have changed in only one revolution around the sun. The health impact of Covid, with over 20 million cases and 1 million deaths worldwide, the emotional strains, anxiety and financial consequences have been tragic for many and will certainly continue to impact lives for months if not years. Additionally, Covid has led to unprecedented changes in our economy and has impacted most aspects of our lives. Schools have gone online, entertainment and leisure in general have been severely disrupted. We are all reminded daily if not hourly of how the world has been turned on its head in so many ways, so I don't need to expound on those here.

Looking forward, I see a long, slow recovery across the Americas. The GDP of the Canada, US and Latin American countries is expected to decline by approximately 6.5%, 5.6% and 8.4%, respectively in 2020. Forecasts for 2021 GDP growth are on the order of magnitude of 5.5%, 3.8%, 3.6%, respectively.

Notably, Canada has done a better job of containing the virus, which is why they are expecting to have a bit of a stronger comeback compared to their US counterparts. Canada is likely to return to full employment either by the end of next year or early 2022. We have seen that Canada's approach to the crisis has been more effective than the US, with a stronger policy and health response.

Canada has also been under pressure with their commodity prices, which is a similar story for any country with an open economy who relies on the US markets.

It is more than a cliché to say that every company's greatest asset is their employees. We feel for all of the people whose jobs were disrupted and the managers who've had to make those difficult decisions. Additionally, long-lived companies with strong brands and a track record of success have already succumbed to a combination of pre-existing financial frailty, Covid and competition from alternative business models. Unquestionably there will be consolidation in many sectors, particularly those that require in-person attendance such as crowded entertainment events, travel and restaurants.

This will have a domino effect on retail, office sales and leasing, which might take years to recover. However, there will be winners, there will be positives that come from this disruption and there is reason to be hopeful.

Companies with access to cash, either through debt or equity, will be better positioned to withstand what may come and to invest in people, new business models, technology and processes that will be required to thrive in the future. We at Hays, for instance, raised equity early in the pandemic in order to ensure we had enough cash during the oncoming downturn, and equally important, to have capital to invest to take early advantage of the upturn.

Long-developing trends in ecommerce, remote work, distance learning, digital home entertainment and other technology-supported transformations have dramatically accelerated. Companies with online or remote services will likely benefit as will many technology companies. Our survey supports this as does our staffing and recruiting business where, for instance, we've seen only modest declines in the demand for IT professionals and, ironically, still see skills shortages.

Many businesses have responded quickly to the pandemic and have now thoroughly tested the concept of remote and flexible working, and the results have increased their trust of their workers' judgement and commitment. Many organizations, including Hays, are truly embracing the concepts of Equity, Diversity and Inclusion, which will play a more prominent and beneficial role in the world of work.

Many of our clients are using this time of disruption as an opportunity to enhance their workforce for the future by recruiting people who would have been unavailable or out of reach pre-Covid.

Longer term, the need for investment in our digital infrastructure and upskilling our workforce has never been more obvious.

We should also never underestimate the vitality and creativity of humans. We adapt to new realities and create new solutions and opportunities. Counter-cyclical investments and ventures launched during downturns often pave the way for the future.

Finally, if nothing else, we've all been given a reminder of how fleeting life and happiness can be, how important health, finance, family and friends (even pets) are, how we should never take them for granted and how we should count our blessings each and every day.

ADDRESSING CONFLICT EFFECTIVELY AND INCLUSIVELY

A key to greater inclusion

Deanna Matzanke
Chief Client Officer Canadian Centre for Diversity & Inclusion

For every organization, no matter how small or how large, it is very important to have clear, plain language policies that set out the commitment of the organization to certain standards and which set the expectations of behaviours to live up to those standards. My experience shows me that, even where there is a comprehensive and inclusive set of policies in place, the area that is most often neglected is conflict resolution. This is because when people work together, it is only a matter of time before a difference of opinion or other conflict arises and without a strong policy framework, every individual will have a different idea of what the expectations should be. Hence, more chance for conflict.

Conflict resolution refers to the informal or formal process that two or more parties use to find a peaceful solution to their dispute. The question that every organization needs to be able to answer is: how can any issue or conflict be effectively resolved? Answering this question means ensuring that you have a clear process to identify and address any conflict. The most effective and inclusive way to manage conflict and create an inclusive environment where different voices can be heard and valued, is to offer an explicit process to address conflict as early as possible, and provide options.

A strong conflict resolution method should have alternate methods that provide informal or formal options, as well as confidential or open formats. Ideally, a manager or supervisor is the best person to address a conflict initially because she/he/they is closest to the day to day work. This is open option. However, there may be situations where an employee is unwilling or uncomfortable speaking with their direct supervisor. To that end, the next option should be a Level 1 escalation to the supervisor's supervisor. Again, if the nature of the conflict, for example, sexual harassment or an issue of ethics, is such that the employee wants to be assured of confidentiality, then providing an alternate escalation method is key. In most organizations, this will involve human resources which provides more confidentiality, but may also be more formal. Some organizations also offer anonymous methods like ethics hotlines, whistleblower lines or even a Staff Ombuds, which can be a more informal support. The most important thing to include alongside the process and options, is a policy description which describes the roles and expectations for each of the steps and which sets out the commitment of the organization to identify and address conflict effectively and inclusively.

Deanna Matzanke is a bilingual Strategic HR and Diversity Professional and employment lawyer with over 25 years' experience in all aspects of minority inclusion and employment systems and practices. She is a certified Global Professional in Human Resources (from the Human Resources Certification Institute) and holds her Human Capital Strategist designation (with the Human Capital Institute). She also specializes in Human Resources Policy and Compliance Frameworks.

5 | COMPENSATION & BENEFITS

In 2021, only 19% percent of employers intend to increase salaries for current staff between 3% – 5%. When competing for top talent, 52% of employers would increase base salaries outside of their budgeted range, compared to last year at 66%. This year, employees expressed that the ability to work from home as one of their most desired benefits.

Ability to work from home

Aside from salary, which of the following factors is most important to you when considering a new role?

REVISITING YOUR BENEFIT OFFERINGS IN THE NEW ERA OF WORK

In these changing times, it is important to reevaluate the benefits that are offered to your employees, and to also ensure that they are aware of the resources available to them. With the world of work evolving quickly, the needs and expectations of employees are also shifting. As we enter the new era of work, below are some important benefits to consider when reviewing your current compensation package offerings.

Flexible work schedules

Many employers are looking for work environments that are conducive to their unique lifestyles. This can make a big impact for staff such as students, personal care givers and new parents. This offering is definitely worth considering especially if staff retention and loyalty is an area of focus for you. For organizations that may not be able to offer flexible work, consider work sharing options that will allow staff to work part time or share one role. The federal [Work Sharing Program](#) supports this as well, whereby staff can access Employment Insurance (EI) for the days they are not working.

Mental health and wellness offerings

Benefits such as Employee Assistance Programs (EAP) or stress management have been offered more widely by employers. This is especially important for employees given increased stressors from external environments, home life, and the workplace. Consider options such as standing desks, onsite flu vaccinations and providing gym memberships or subsidies.

Expand sick and personal days

Increasing the number of days offered, for example increasing from 7 days to 10 days can make a significant difference for staff wellbeing. This will also encourage people to stay home and take time off they need to fully recover when they are sick.

6 | SKILLS SHORTAGE

The skills shortage still looms, however it has improved by 11% from last year with 68% of employers citing a skills shortage in their industry. This gap impacts both employer growth plans and employee job satisfaction. Forty percent of employees have reported an increase in stress and pressure on their team as employers attempt to make do with less.

Five year trend for employers affected by the skills shortage

HOW CAN YOU CLOSE THE SKILLS GAP ON YOUR TEAM?

1 | Research training platforms for your team

Online training is convenient, flexible and often more cost effective than other forms of training. Its relevance however, has been elevated during this time when many people are working remotely. Although budgets are tight, there is a wealth of free or cost-effective online training resources available, such as [Hays Thrive](#), so research which will be most beneficial to your team. You should also consider webinars and virtual conferences and events.

2 | Arrange a weekly team call that is solely dedicated to learning and development

It's crucial to make learning and development central to your team culture and part of your weekly routine, rather than just a one-off webinar here or there. One way to achieve this is to hold regular team meetings to talk about what everyone has learnt that week, or maybe what skills they are currently working on developing in their upskilling projects. Perhaps you could ask a different team member to host the call each week, tasking them with giving a quick 10-minute seminar on something interesting they've learnt recently?

3 | Set up a group chat dedicated to upskilling

This could be a great place for employees to share links to items and resources that have inspired them lately. Perhaps a team member has recently listened to a podcast, downloaded an app or read a book that they found really interesting and useful? Your employees can also share details of upcoming webinars, TED Talks or virtual 'lunch and learns' they are going to attend. This helps to further encourage an environment and culture of learning, in which your team knows that you value their development, and you're committed to allowing them access to all helpful materials.

4 | Hire temporary workers

Over the last 12 months, 15% of employers increased their temporary or contract headcount. When bringing contractors onboard, there is no long-term commitment or financial risk. They are their own employers who are only paid for the time they work, and it is not required to supply health insurance, holiday pay or any paid time off. "Taking advantage of contractors to help close the skills gap on your team will ensure you have the right skills on board at all times. By having the optimal mix of contract and permanent employees, companies can be better equipped to respond quickly to the market. Contract workers not only help fill the immediate skills you need, but are also specialized in jumping into projects and contributing from day one.," according to Thomas Harrer, Regional Director for Hays.

7 | REMOTE WORK

Percentage of employers who trust their employees when working remotely

When working remotely, employers struggle with maintaining employee motivation and engagement, while employees find disconnecting after work hours to be a challenge. Interestingly, only six-teen percent of employers felt their staff had an increase in productivity however 33% of employees believed that their productivity increased while working remotely.

REMOTE WORK OPTIONS – BUSINESS AS USUAL? THREE CONSIDERATIONS FOR MANAGERS

If there's one thing the pandemic has shown us, it's that a large percentage of the workforce can work successfully from home. In fact, 40% of employers cited that remote working options will be integrated as part of the normal practices for their workforce. Here are three key considerations for managers to help determine how they can make continued remote working feasible for their organization and individual employees.

1 | What percentage of the workforce can you support working remotely?

It's unrealistic to expect that 100% of your workforce can continue to work from home 100% of the time. But it's also unrealistic to think that your entire workforce should return to working exclusively in one co-located workplace once the need to stay away subsides. Therefore, think about what ideal daily percentage of your workforce you could support working remotely without impacting client engagement, mental health or team culture. Whether it's 20%, 30%, 50% or more, you should expect this to become the new norm, as people look to continue working remotely.

2 | Should you continue with video calls as your default for meetings?

In a hybrid team, video conference tools and collaboration platforms should remain your channel for regular team meetings and collaboration. This will help minimize any sense of disconnectedness for your remote staff. Additionally, just as you did when all staff were working remotely, make sure you maintain regular communication and rapport with your remote workers. Avoid email fatigue by picking up the phone on a regular basis and do not skip planned one-on-ones with your remote workers, who rely on this one regular connection with you to prioritize their work or ask the questions required to move forward with tasks.

3 | How can your hybrid team successfully share knowledge with each other?

Being part of a team where every employee is working from home every day is a very different experience to doing so when some colleagues are back in a co-located workspace. It is important to consider how you can bring your hybrid team together to share insights and experience the informal information exchange that typically results from casual conversations between people discussing their day and current tasks. For example, perhaps you could encourage your remote workers to talk to at least one office-based colleague per day.

8 | EMPLOYEE SATISFACTION & WELLBEING

Forty-nine percent of employees are seriously considering leaving their current role and 21% are anticipating to change jobs within the next 3 months. The main reasons? Rising expectations about compensation, lack of career growth opportunity and the types of benefits offered.

MENTAL WELLBEING THE COVID LEGACY

Dr. Maggi Evans

Chartered Occupational Psychologist, Consultant and Coach

It's always important to support people's mental health and wellbeing, but COVID 19 has brought it more into the spotlight than ever. First, employers had to support people to manage general anxiety and the sudden transition to remote working, but now it's shifting to how to manage ongoing uncertainty and a gradual return to some office working (albeit under new stringent health and safety conditions). So, what can leaders and managers do? How can we help our teams to thrive in these challenging times? Here are my top 3 tips

1. Anxiety is a normal response to the current situation.

People are coping with huge uncertainty, additional demands from things like childcare and home-working and their normal support systems (like socializing, holidays or gyms) are not accessible in the same way. So, it's not surprising that people are finding it tough. We need to make sure that people know who to talk with and to feel safe to talk about mental health issues without fear of being stigmatized.

2. Empower and educate people to help themselves.

We can help people to help themselves by sharing information and motivating people to stay physically, mentally and work fit – all of which work together to help people to thrive and perform at their best. Work fitness is a new idea for lots of people, but it's a key part of wellbeing – making sure you are clear on goals and priorities, that you have effective working practices (especially important when remote working) and that your work station promotes pain-free work.

3. Managers are on the front line.

Each person in your organization will have something different that they are concerned about, worried about – or that they need to feel really motivated. Managers need to be encouraged and supported to embrace this. All managers should be having regular one to one check-ins with their team to ask how people are, to explore what's going well for them and how things could be better.

These are simple things to put in place – but they need to be constantly reinforced and communicated. Judging by the news, the mental health implications of COVID-19 will be with us for some time.

Maggi is an experienced consultant and coach with international experience across a wide range of sectors including professional services, financial services, retail and FMCG. She is a Chartered Occupational Psychologist and combines research and practice to develop practical solutions to drive business improvement. Maggi has been a consultant for over 20 years, specializing in talent strategy and talent development. Maggi is on a mission to help organizations, leaders and individuals to liberate talent. Her first book ['From Talent Management to Talent Liberation'](#) has recently been published.

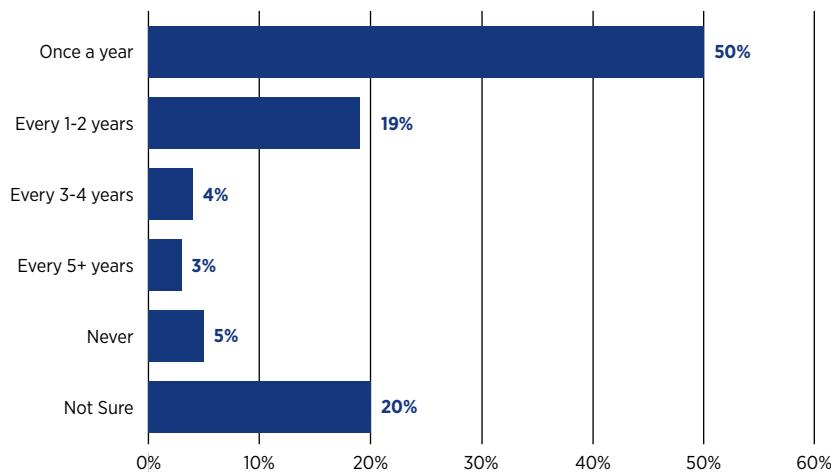

9 | PIVOTING BUSINESS MODELS

Fifty percent of employers cited that their internal processes are reviewed once a year in order to remain flexible in the face of change. Focusing on priorities and desired results came in as the top measures companies are taking in order to reduce the level of bureaucracy in the workplace.

In what ways is your company reducing bureaucracy in the workplace?

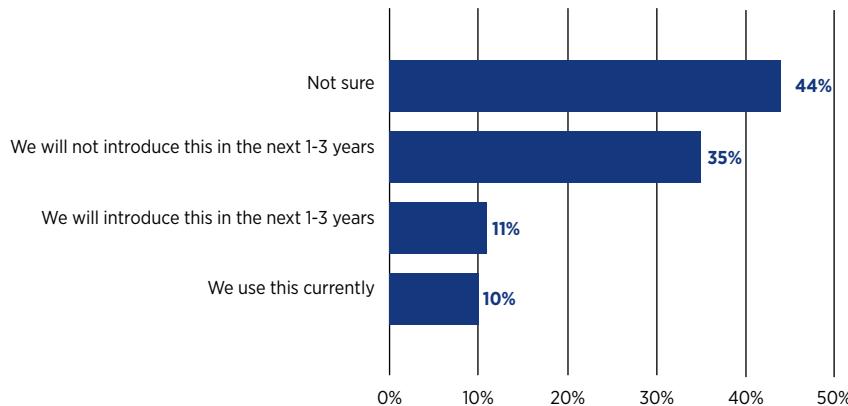

How often does your company review internal processes?

Measures employers are taking to integrate temporarily laid off employees back into the workplace

Throughout the hiring process, does your company use artificial intelligence/machine learning to be more efficient?

31%
of employers understand how artificial intelligence is going to affect their hiring process over the next 3 years

Q&A INTERVIEW

HOW LEADERS CAN MANAGE CHANGE IN THE NEW ERA OF WORK

Alex Fraser
Group Head of Change, Hays

As a result of the global COVID-19 outbreak, the world of work is undergoing unprecedented long-term change. Our professional lives will never be the same again, and that presents a challenge for leaders. We spoke with Alex Fraser, Group Head of Organizational Change at Hays about how leaders can manage the significant changes, as we transition to a new era of work post-crisis.

How important is it that leaders have their finger on the pulse of their people when navigating through this change?

It's critical – I think we have all experienced a real roller coaster of emotions over the last few months. We need to really make sure that we are asking those questions on a regular basis and that we're really listening to the feedback and amending our plans accordingly. It's really important that we do that as transparently as possible so that people understand what's working, what's not and what we're doing about it. We also need to be having an ongoing dialogue with our people about how they're dealing with the new ways of working either in the office or at home and we need to be listening really carefully to explore how our people are, and make sure that we understand the signs of someone not coping well and determine how we can support them.

A key role of a leader is to build and communicate their vision. Do you think this will become even more important as we try to navigate through the major changes?

Yes, one of the key roles a leader plays here is helping people to see the light at the end of the tunnel and show how we will be able to get there. People really need a North star and a sense of purpose to enable them to stay resilient and bounce back. They need to know there is a clear plan and that it will enable them to be successful going forward. As leaders we play a really vital role in reminding people that we will get through this and we will progress.

What can leaders do to alleviate some of the change fatigue their people may be experiencing through these times?

First of all, we need to make sure that we are prioritizing and planning. It's really tempting right now to try and boil the ocean, but actually we need to take time to consider what needs to be done now and what could be introduced later and that will really make sure that the changes will be introduced in a way that means they can be sustained. If we try to do too many things simultaneously, the likelihood is that none of them will be truly successful. Uncertainty and ambiguity is only serving to frustrate and confuse people, so we need to keep on talking. We need to keep telling people what's going on. We also need to make sure we're listening because in times of change people often need to get their feelings out.

Adaptability and agile working are going to be key to succeed in the future, how can leaders work with their teams to develop them in these areas?

This is a difficult question, but there are a few things that I would suggest we all get used to doing. First of all, I think we all need to think about how we normally react to change and what sits behind that. So, some people will be very cynical, some people will be very supportive, but we need to understand what drives that in ourselves and whether that's a helpful reaction to have. We need to teach our people to be able to break changes down for themselves and make it personal to them. It's important that they can keep it in perspective because something can easily get blown out of proportion in their mind, so it's critical that they're able to frame it in the right context. The other thing for me is having that really open team environment where questions are expected, and the mistakes are seen as learning opportunities for all, because I think that's a really important bedrock to have on which to build.

Leaders have their part to play in helping their people navigate massive change in this new era of work, but how can they encourage and empower their people to take some personal responsibility here as well?

There absolutely has to be a collective sense of responsibility for shaping the new normal and making it work. One of the key success factors in any change is ensuring that anyone who will be impacted by the change feels involved and as if they have some degree of influence. This is a great opportunity to get employees to suggest their own ideas for what the new normal should look like and what those critical success factors need to be. It can't be seen as something that is being done to them, rather it's a future that is designed for them by them.

Alex Fraser joined Hays from KPMG last year, from where she led the development of our own Hays Change methodology. Alex has responsibility for developing our change capability globally, driving our key strategic change projects, and ensuring that we maintain a truly agile culture, where sustainable change is a key part of the norm enabling continuing growth of the business. She brings with her with over 20 years consultancy experience, managing and leading large scale global transformation programs and embedding sustainable change in complex environments.

10 | SALARY TABLES

The following pages provide a listing of the typical base wages for the commonly filled roles for professional and skilled staff in:

[ACCOUNTING & FINANCE ▶](#)

[ARCHITECTURE & INTERIOR DESIGN ▶](#)

[CONSTRUCTION ▶](#)

[HUMAN RESOURCES ▶](#)

[INFORMATION TECHNOLOGY & DIGITAL ▶](#)

[LEGAL ▶](#)

[MANUFACTURING & LOGISTICS ▶](#)

[OFFICE PROFESSIONALS ▶](#)

[PROCUREMENT ▶](#)

[PROPERTY & FACILITIES MANAGEMENT ▶](#)

[RESOURCES & MINING ▶](#)

[SALES & MARKETING ▶](#)

For salary ranges, the first figure indicates the minimum and the second figure indicates the maximum salary level typically paid in each city or region. Where only one figure is reported, it represents the minimum wage for more senior positions that can have a very wide range and no clearly defined upper limit. Salaries are expressed in Canadian dollars (thousands, annual gross) and do not reflect any benefits packages, bonuses, or any other arrangements between employers and candidates. While every care is taken in the collection and compilation of data, this report is interpretive and indicative, not conclusive. Please note that the Hot Jobs listed may vary by region.

This information should be used as a guide only.
